DETAILED ACTION

Claims 1-10 have been cancelled by preliminary Amendment filed on February 19, 2002. Therefore, claims 11-19 are currently pending in this application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

Lack of Unity Requirement

Claims 11-19 are drawn to more than one inventive concept (as defined by PCT Rule 13), and accordingly, a restriction is required according to the provision of PCT Rule 13.2.

PCT Rule 13.2 states that the international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept (requirement of unity of invention).

PCT Rule 13.2 states that unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features.

Annex B, Part 1(b), provides that "special technical features" mean those technical features, which, as a whole, define a contribution over the prior art.

Annex B, Part 1 (e), provides combinations of different categories of claims and states:

"The method for determining unity of invention under Rule 13 shall be construed as permitting, in particular, the inclusion of any one of the following combinations of claims of different categories in the same international application:

- (i) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for a use of the said product, or
- (ii) in addition to an independent claim for a given process, an independent claim for an apparatus or means specifically designed for carrying out the said process, or
- (iii) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for an apparatus or

means specifically designed for carrying out the said process, . . .”

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

I. Claim 11, is drawn to an unsaturated fatty alcohol sulfate, classified in class 558 and several subclasses.

II. Claims 12-16 and 18, are drawn to a first method of preparing an unsaturated fatty alcohol sulfate, classified in class 558 and several subclasses.

III. Claims 17 and 19, are drawn to a second method of preparing an unsaturated fatty alcohol sulfate, classified in class 558 and several subclasses.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: they do not share the same essential structural element(s) that define the “special technical feature” necessary to specify a contribution over the prior art. The structural moiety common to all the groups is unsaturated fatty alcohol sulfate. This feature was known in the art prior to filing of the instant application. See Zimaiti et al. Accordingly, the unity of invention is considered to be lacking and restriction of the invention I accordance with rules of unity of invention is considered proper.

The inventions of Group I-III are distinct, each from the other, because they differ in structure and/or element so as to be patentably distinct and a prior art reference anticipating but one of the groups would not render obvious the other groups under 35 U.S.C. 103.

A telephone call was made to Mr. John E. Drach, on 09/05/03 to request an oral election to the above restriction requirement, but did not result in an election being made.
